

TIJERAS DE CIRUGÍA

Nahita offers a wide range of surgical scissors available in several sizes, with straight or curved tips and sharp or blunt blades to adapt to all necessities. Made of stainless steel, they are resistant to corrosion when exposed to blood, body fluids or cleaning solutions, and can be repeatedly cleaned in ultrasonic baths and sterilized in autoclave.

Straight surgical scissors

1 | With straight tips, they are used for general purposes such as cutting gauzes and suture material.

Reference	Length	Model
62112112	115 mm	Sharp-Sharp
62112132	125 mm	Sharp-Blunt
62112114	140 mm	Sharp-Sharp
62112134	140 mm	Sharp-Blunt
62112154	140 mm	Blunt-Blunt
62112116	160 mm	Sharp-Sharp
62112136	160 mm	Sharp-Blunt
62112156	160 mm	Blunt-Blunt
62112118	180 mm	Sharp-Sharp
62112158	180 mm	Blunt-Blunt

Curved surgical scissors

1 | Thanks to the curved tip they are ideal for cutting and dissecting tissues.

Reference	Length	Model
62112212	125 mm	Sharp-Sharp
62112232	125 mm	Sharp-Blunt
62112252	125 mm	Blunt-Blunt
62112214	140 mm	Sharp-Sharp
62112234	130 mm	Sharp-Blunt
62112254	140 mm	Blunt-Blunt
62112216	160 mm	Sharp-Sharp
62112236	160 mm	Sharp-Blunt
62112256	160 mm	Blunt-Blunt

Mayo scissors

- 1 | Strong scissors characterized by a fixed and resistant joint.
- 2 | The tip, with sharp blades, can be straight or curved.
- 3 | Ideal for cutting sutures, probes, etc., as well as tissues that can not be cut with more delicate scissors

Reference	Length	Model
62151114	140 mm	Straight
62151116	160 mm	Straight
62151214	140 mm	Curved
62151216	160 mm	Curved

Littauer scissors

- 1 | Specially designed for cutting skin sutures.
- 2 | One of the blades presents a hook-shape for being easily slipped under the suture and avoiding the suture slipping down the blade while cutting.

Reference	Length	Model
62163114	140 mm	Straight, 28 mm
62163124	140 mm	Straight, 40 mm
