URIVET hand refractometer

**hand
refractometer**
URIVET

The new Zuzi hand refractometer URIVET has been specially designed for Veterinary applications and more specifically for cat and dog urine analysis. Simple, fast and very easy to use it allows obtaining immediate measurements with just a drop of urine.

Made of metal body and calibrated at 20°C, it is provided with automatic temperature compensation (ATC) and dioptre adjustment ring to adapt to the vision of different users. It is also provided in plastic case.

URIVET
**technical
features**

Code	HPM003
Model	URIVET
Measuring range	
Specific gravity (S.G.)	1.000 - 1.060
Serum proteins (g/100mL)	2 – 14
Resolution	
Specific gravity (S.G.)	0.001
Serum proteins (g/100mL)	0.1
ATC	Yes
